One-to-one tuition is by far the fastest and most effective way to acquire/learn a language. In essence the lessons are tailored to **YOU**, according to **YOUR** individual needs and interests.

We also learn better when activities are interesting and enjoyable. That's why our classes are varied, interactive and fun, with lots of encouragement and rewards. We place particular emphasis on listening and speaking, communication and use of the new language from the onset, because we don't just want our pupils/students to 'know' the language but we want them to enjoy using it!
